

ANATOMY OF A HEELIFT®

The Anatomy of the Heelift Suspension Boot was designed with all of the features required for the prevention and treatment of heel pressure ulcers.

- Three sizes: Standard, Bariatric, and Petite
- Two foam interiors: Smooth (for edematous legs) and convoluted (for a cooler option)
- Can be machine-washed and dried or autoclaved

The soft foam design and a spare elevation pad make it **easy to customise** the Heelift to meet a patient's unique needs:

- Relieve pressure on the Achilles tendon or ankle
- Prevent foot drop
- Control hip rotation

Versatile. Customisable. Heelift® Suspension Boot.

Heelift® Original and Smooth Patent No. 5,449,339 & 7,458,948.

There is only one Heelift.®
